11 April 2011

“Cement Australia is currently working with the Department of Planning to respond to the submissions raised in the public consultation process of its development application. This is an ongoing process and while we are not able to comment on the individual submissions, we can confirm that the proposed grinding mill will need to meet with the required air quality, traffic movement and noise level standards if the application is to be approved.

This has been an open and transparent process. Prior to submitting its development application, Cement Australia undertook extensive consultation with the local community in Port Kembla.” Andrew Ward, General Manager – Strategic Business.
