SAFETY DATA SHEET Fly Ash

Section 1: Identification of the Material and Supplier

Company Details

Cement Australia Pty Limited

ABN 75 104 053 474	Tel: 1300 CEMENT (1300 236 368)
18 Station Avenue	Fax: 1800 CEMENT (1800 236 368)
Darra, Queensland 4076	Website: www.cementaustralia.com.au
Emergency Contact Number:	Contact Person: Technical Manager Telephone: 1300 CEMENT (1300 236 368 - Business Hours) or Poisons Information Centre 13 11 26

Manufacturing Plants

Gladstone Power Station:	Port Curtis Way, Callemondah Queensland 4680	
Callide Power Station:	Callide Dam Road, Mt Murchison Queensland 4715	
Stanwell Power Station:	Switchyard Road, Stanwell QLD 4702	
Flyash Australia Pty Ltd:	Eraring, Bayswater and Mt Piper Power Stations. Head Office - 12 Tryon	
	Road, Lindfield New South Wales 2070	

Product

Name:	Fly Ash
Other Names:	Gladstone Ash Callide Ash Melbourne Ash (Blend of Gladstone and Callide Ash) Central Queensland Ash (Blend of Gladstone and Callide Ash) North Queensland Ash (Blend of various QLD Ash sources) NSW Ash (Blend of Gladstone and Callide Ash) Kaolite High Performance Ash (HPA, Special Grade Fly Ash, Ultrafine Fly Ash) High Performance Ash (HP Ash)
Use:	Supplementary cementitious material for concrete. Also, used in soil stabilisation and as a fine filler in asphalt and other products. Fly Ash (CAS - 68131-74-8) composition varies based on the Source Coal used at various power stations. These numbers reflect the various ranges in composition and the SDS covers the highest GHS rating based on the product
	with the highest concentration.

For more information call **1300 CEMENT** (1300 236 368) or visit **www.cementaustralia.com.au**

Section 2: Hazards Identification

2.1 Classification

DANGER

GHS CLASSIFICATION

Classified as Hazardous according to the Safe Work Australia guidelines for Globally Harmonised System of Classification and Labelling of Chemicals (GHS).

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Hazard Class and Category

Skin Corrosion/Irritation: Category 2 Serious Eye Damage / Eye Irritation: Category 2A Specific Target Organ Systemic Toxicity (Single Exposure): Category 3 Specific Target Organ Systemic Toxicity (Repeated Exposure): Category 2

2.2 GHS Label elements

Pictograms and Signal Words

DANGER

Hazard Statement(s)

H315	Causes skin irritation.
H318	Causes serious eye irritation.
H335	May cause respiratory irritation.
H373	May cause damage to organs through prolonged or repeated exposure.

Prevention Statement(s)

P101	If medical advice is needed, have product container or label at hand.
P202	Do not handle until all safety precautions have been read and understood.
P103	Read label before use.
P260 + P261	Do not breathe dust. Avoid breathing dust.
P264	Wash any skin exposed to the product thoroughly after handling. Do not touch eyes until hands are thoroughly washed clean of material.

P271	Use only outdoors or in a well-ventilated area.
P280	Wear protective gloves in accordance with AS2161. Wear dust proof eye protection in
	accordance with (AS/NZS1337.1).

Response Statement(s)

P305+P351+P338	IF IN EYES: Immediately call POISON CENTRE 131126 or Doctor. Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.
P302 + P352	IF ON SKIN: Wash with plenty of soap and water.
P332 + P313	If skin irritation occurs: Get medical advice/attention.
P304 + P340 + P305	IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.
P310	Immediately call POISON CENTRE 131126 or Doctor if you feel unwell.
P321	Specific treatment is advised - see first aid instructions.
P362	Take off contaminated clothing and wash before re-use.

Storage Statement(s)

P403+P233	Store in a well-ventilated place. Keep container tightly closed.
P405	Keep container tightly closed. Store locked up.

Disposal Statement(s)

P501

Dispose of unused contents in accordance with jurisdictional regulations.

2.3 Other hazards

No information provided.

Section 3: Composition/Information on Ingredients

Fly Ash (CAS - 68131-74-8) composition varies based on the Source Coal used at power station. These numbers reflect the various ranges in composition and the SDS covers the highest GHS rating based on the product with the highest concentration.

Chemical Entity	Proportion	CAS Number
Mullite	5-30%	1302-93-8
Crystalline Silica (Quartz)	<5.0%	14808-60-7
Total respirable silica	Below reporting limits	14808-60-7
Hexavalent Chromium Cr (VI)	<1ppm	18540-29-9

Note: It should be assumed that silica content is sufficient to create a silica hazard in work conditions where fine dust becomes airborne.

Section 4: First Aid Measures

Swallowed:	Wash mouth with water. Give plenty of water to drink. Do not induce vomiting. Seek medical advice if symptoms persist.
Eyes:	Flush thoroughly with flowing water for 15 minutes to remove all traces. If symptoms or irritation persist, seek medical attention.
Skin:	Wash with soap and water. Remove and wash affected clothing before reuse.

Inhalation:	Remove to fresh air, away from dusty area. If symptoms persist, seek medical attention.
First Aid Facilities:	Eye wash station.
Advice to Doctor:	Treat symptomatically

Section 5: Fire Fighting Measures

Fire/Explosion Hazard:	None
Hazchem Code:	None allocated
Flammability:	Not flammable
Extinguishing Media:	None required
Hazards from Combustion Products:	None
Special Protective Precautions and equipment for fire fighters:	None

Section 6: Accidental Release Measures

Spills:A fine water spray should be used to suppress dust when sweeping. Wet sweep or vacuum
dust with industrial vacuum cleaner.Clean up
ProcedureWork areas should be cleaned regularly by wet sweeping or vacuuming. Collect in containers
and dispose of as trade waste in accordance with local authority guidelines. Keep out of
stormwater and sewer drains.

Personal protection recommendations should be followed - see Section 8.

Section 7: Handling and Storage

Storage:	Keep in a dry place.
Conditions of safe storage:	When handled pneumatically use standard dust filters on vehicles and
	silos.
Incompatibilities:	None

Section 8: Exposure Controls/Personal Protection

8.1 Control parameters

Exposure standards

		٦	TWA		STEL	
Ingredient	Reference	ppm	mg/m³	ppm	mg/m³	
Silica – Crystalline Quartz (respirable dust)	SWA (AUS)		0.05			
Chromium (VI) compounds (as Cr)	SWA (AUS)		0.05			

8.2 Exposure controls

Engineering controls

Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical extraction ventilation is recommended. Maintain dust levels below the recommended exposure standard.

PPE

Eye / Face

Wear safety glasses or dust-proof goggles when handling material to avoid contact with eyes.

Hands	Wear PVC, rubber or cotton gloves when handling material to prevent skin contact.
Body	Wear long sleeved shirt and full-length trousers.
Respiratory	Where an inhalation risk exists wear a Class P1 (Particulate) respirator, dependent on a site-specific risk assessment.

Section 9: Physical and Chemical Properties

Appearance:	Fine powder – light grey to fawn
Odour:	No odour
Boiling/Melting Point:	Melting point >1400°C
Vapour Pressure:	Not applicable
Specific Gravity:	2.35 - 2.40
Flash Point:	Not flammable
Flammability Limits:	Not applicable
Solubility in Water:	Essentially insoluble
Particle Size:	Approximately 40% of particles are respirable (\leq 7 micron in diameter)

Section 10: Stability and Reactivity

Chemical Stability:	Chemically stable	
Conditions to Avoid:	None	
Incompatible Materials:	None	
Hazardous Decomposition Products:	None	
Hazardous Reactions:	None	

Section 11: Toxicological Information

Acute toxicity	Has a caustic reaction and is corrosive to the mouth and throat.
Skin	Irritating to the skin. Contact with powder or wetted form may result in caustic reaction, rash and dermatitis.
Еуе	Irritation and corrosive to the eyes. May cause chemical conjunctivitis and redness and watering of eyes and damage to cornea.
Sensitization	Irritating and drying to the skin. May cause alkali burns and irritant or allergic dermatitis.
Mutagenicity	Insufficient data available to classify as a mutagen.
Carcinogenicity	This product contains crystalline silica which is classified as carcinogenic to humans (IARC Group 1). However, there is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis. Therefore, preventing the onset of silicosis will also reduce the cancer risk.
Reproductive STOT – single exposure	Insufficient data available to classify as a reproductive toxin. Irritating to the respiratory system. Over exposure may result in irritation of the nose and throat, with coughing. High level exposure may result in breathing difficulties.
STOT – repeated exposure	Repeated exposure to respirable silica may result in pulmonary fibrosis (silicosis). Silicosis is a fibronodular lung disease caused deposition in the lungs of fine respirable particles of crystalline silica. Principal symptoms of silicosis are coughing and breathlessness. In the wet state, the likelihood of an inhalation hazard is reduced.
Aspiration	This product is a solid and aspiration hazards are not expected to occur.

Section 12: Ecological Information

Unlikely to have a negative impact on plant life or animals. Product is persistent and would have a low degradability. A low mobility would be expected in a landfill setting.

Section 13: Disposal Considerations

Follow personal protection safety requirements. Collect in containers and dispose as trade waste and land fill in accordance with local authority guidelines. Keep out of stormwater and sewer drains.

Section 14: Transport Information

UN Number:	None allocated
Proper Shipping Name:	None allocated
Class and Subsidiary Risk:	Not applicable
Packing Group:	None allocated
Special precautions for user:	Avoid generating and breathing dust
Hazchem Code:	None allocated

Section 15: Regulatory Information

Classified as non-Dangerous Goods. All chemicals listed on the Australian Inventory of Chemical Substances (AICS)

Section 16: Other Information

For further information on this
product contact:Telephone: 1300 CEMENT (1300 236 368 - Business Hours)Facsimile: 1800 CEMENT (1800 236 368)

Previous Edition: 2014 - GHS Compliance edits made and supplementary compliance edits added.

2020 – Format updates 2022/2023 – Format updates

Next Review Date for this SDS: 31 December 2026.

Australian and New Zealand Standards:

AS 2161: Industrial Safety Gloves and Mittens (excluding electrical and medical gloves).

AS/NZ 1336: Recommended Practices for Occupational Eye Protection.

AS/NZS 1715: Selection, use and maintenance of respiratory protective devices.

AS/NZS 1716: Respiratory protective devices.

AS/NZS 4501: Occupational protective clothing.

Advice Note:

Cement Australia believes the information in this document to be accurate as at the date of preparation, but, to the maximum extent permitted by law, Cement Australia accepts no responsibility for any loss or damage caused by any person acting or refraining from action because of this information.

The provision of this information should not be construed by anyone as a recommendation to use this product. No one should use any product in violation of any patent or other intellectual proprietary rights or in breach of any statute or regulation.

Users should rely on their own knowledge and inquiries and make their own determination as to the applicability of this information in relation to their particular purposes and specific circumstances. Each user should read this MSDS and consider the information in the context of how the product will be handled and used in the workplace and in conjunction with other substances or products.
